## THIRD CYCLE DISCOUNTS

At King's Fertility, we value the trust our patients place in us. As a gesture of appreciation, we offer a 25% discount on every third cycle of the same treatment type (e.g. IVF, IUI, or Egg freezing cycle) completed within a twelve-month period.

There's no need to commit to a multi-cycle package upfront – we'll automatically apply the discount when you book the third cycle, so you can plan treatment at your own pace.

This discount applies exclusively to the clinic's core IVF, IUI, or Egg freezing 1-cycle fee in effect at the time of treatment and does not include medication, storage, or additional procedures such as ICSI or PGT.

It is applied at the discretion of King's Fertility, in consultation with your clinical team and in line with your individual treatment plan.

## MEDICATION CHARGES

Medication charges are charged per cycle, please see the approximate medication costs per cycle in the 'Example medication costs' section. This will also be included in your costed treatment plan.
